

CASING GUIDE

General Information

The field proven WellPartner Casing Guide is a light weight conductor and casing guiding tool. The WellPartner Casing Guide will assist with stabbing off casing and conductor strings into subsea wellheads during drilling operations. The Casing Guide is mounted onto the casing and/or conductor in the rig moonpool area, and is released subsea by an ROV after a successful stabbing. The lightweight Casing Guide can be lifted by one person.

Technical Specifications

Data - 30" Model

- Size (D/H): \varnothing 1,05m / 0,15m
- Weight: 26 kg
- Material: Aluminum / S165m
- Lateral Force: Maximum 2MT

Data - 20" Model

- Size (D/H): \varnothing 0,73m / 0,15m
- Weight: 24 kg
- Material: Aluminum / S165m
- Lateral Force: Maximum 2MT

The Casing Guide characteristics

- Save rig-time
- Field proven
- Light weight
- Easy to install
- ROV retrievable
- Re-usable
- Standard size 30" and 20"
- Can be delivered in any size
- The Casing Guide can be used on any drilling unit operating with a guide wire system
